

AEROSPORT VC715SA

AEROSPORT VC715SA

The Pace American AeroSport Series is the trailer of choice when looking to improve fuel economy with an aerodynamic V-nose that also maximizes interior volume.

The combined V-nose and flat top roof design cuts through the wind better than a conventional flat front trailer and makes towing easy and safe. Unlike flat-front trailers, AeroSport adds cargo area over the frame leading to the trailer hitch, allowing for additional front space without increasing overall length.

Available as a 7' or 8.5' wide bumper-pull tag model, AeroSport is a great cargo trailer. Rear ramp door models are perfect for hauling automobiles, motorcycles, snowmobiles, or ATVs, showing the true versatility of the V-nose trailer design. Add an optional front ramp for easy drive-through convenience - never back out of your trailer again. Ask your local dealer about available packages and options targeting your favorite motorsport.

AeroSport is built to Pace's high quality standards, and is backed by our 3-year limited warranty. Our nationwide dealer network provides industry leading customer service and parts to keep you going long after the sale.
